Messrs. Noble & Cooley,

Granville, Mass.

Dear Sirs:-

As a steam user, the enclosed sample of "Olympia" Asbesto-Metallic Sheeting should interest you. The fabric is composed of Asbestos with a brass wire in the warp and weft to give it additional strength. A joint packed with this material will never blow out. It is cheaper than packings composed largely of rubber and fillers as it weighs only about half as much. If you have never used it, why not send for a trial lot? Price 85¢ per pound. Telephone at our expense for anything you may need in our line. We keep a full assortment of Magnesia (85%) Coverings, Asbestos Materials, etc.

Yours very truly,
C. W. TRAINER MFG. CO.
